

## Setting Up a VPN Connection for Macs Running OS 10.4

1. From your `Applications` folder, open **Internet Connect**. When the program opens, from the **File** menu, select **New VPN Connection**.
2. On the sheet that drops down, select the radio button next to **L2TP over IPsec**, and then click **Continue**.
3. Next to "Server address:", enter the appropriate server address:

**ipsec.indiana.edu**

4. For "Account Name:" and "Password:" enter your IU **Network ID** username and password

If your username and password are not accepted, try entering your username with the following format (replace `username` with your Network ID username):

`ads\username`

5. Next to "Configuration:" select **Edit Configurations...** In the sheet that appears, next to "Save As:" type a descriptive name such as "IU IPsec". Click **Save**.
6. In the sheet that appears, make sure the descriptive name you just saved is selected under "Configuration", then next to "Shared Secret:", type:

`hermanbwells`

7. Click **OK**.
